SILAGE WRAPPING FILM

Silage wrapping film

25µm

POLISH MANUFACTURER

Eco Raldus Wrap is a high quality multilayer bale wrapping film produced in Poland using the blown method. Eco Raldus Wrap guarantees the perfect haylage, providing animals with feed with the right amount of nutrients. The silage film is resistant to changing weather conditions and high protection against harmful UV rays. Eco Raldus Wrap is compatible with all types of wrappers. The film is environment friendly and can be fully recycled in 100%, thanks to that supports environmental protection.

Eco Raldus Wrap technical specification:

- excellent adhesive strength with improved elasticity
- high resistance to perforation makes it ideal for use with high speed automatic wrappers
- withstands piercing dry stalks and angular corners of square bales
- UV Stabilised to offer greater protection from sunlight and withstand outdoor exposure for up to 12 months, thus improving fermentation

Eco Raldus Wrap is an innovative product that was introduced to the market after years of research and testing, which were aimed at obtaining a film that will work in all weather conditions. Currently, the silage film has been recognized in countries such as: Brazil, France, Hungary, Ireland, Spain and RPA.
