SILAGE WRAP FILM

Silage wrap film

Pro Elite Wrap is bale wrapping film, made from special raw materials to meet all customers needs. Thanks to its unique composition it is thinner than a normal film but equally powerful and extensible. **Pro Elite Wrap** is a virgin – not a pre-stretch film. We use the latest recipes to get a quality product at an optimal cost. Due to high strength and puncture resistant it is often used by professionals. The film is available in size 1500 meters as well as 1900 meters. Multilayered blown film structure ensures best quality of the silage, allowing it to be stored for more than 12 months.

Specifications and methods used in our film include:

- double Glue,
- stretch up to 80 %,
- highest quality components,
- compatible with all bale wrapping machines,
- plastic core or Paper core,
- ultra strong ,
- three colors: white, green and black,
- available in all sizes: 1000/750/500/370/250 mm of width

Reduction of thickness in time of wrapping a bale with **Pro Elite Wrap** generates up to 25 % less waste. Stabilized UV filter included into the film protects the silage from UV radiation. The film is available all around the world through our export department in Poland. **Pro Elite Wrap** film is environment friendly and can be fully recycled in 100 %.
