Elite Raldus Net is manufactured to the highest standards of quality confirmed by certificates, to give the customer product, which is efficient and reliable in all conditions, and for all types of crops. Net is made of high quality HDPE polymers. Elite Raldus Net allows making a bale of an ideal shape, which minimalists gas exchange and makes it easier to wrap with film.

Flexibility and durability of the net allows for tight packaging of the raw material ready for storage and reduces waste from crops, it also allows for safe transport. UV filters used in Elite Raldus Net perfectly protect the product in all weather conditions.

**Product specification:**

- high durability,
- protection against weather conditions,
- antistatic additives added to each roll,
- UV stabilizer,
- marked end of the roll 50 m before the end,
- maximum coverage of the bale surface, perfectly wrapped rollers,
- made of 100% recyclable materials

Elite Raldus net is available in various sizes depending on the client's needs. The Net is available all around the world through our export department in Poland.
